

Audio Forensics CENCOR

www.perizieaudiocencor.it

+39 349 3552452 / +39 389 4694079

Consultancy and services in audio forensics

All operations are performed without altering the original materials

Main services - processing of records:

- Improvement of the speech comprehension through audio restoration and reduction of background noises
- Study of the speaker's voice through analysis of the speech signal (accent, geographical origin, study of any linguistic peculiarities...)
- Speakers comparison (with acoustic, automatic and semi-automatic methods);
- Extrapolation of identifying information and environmental or background sounds;
- Check the authenticity or identify the tampering of audio records
- Transcripts in Italian and English (if required, in other languages or dialects)
- Extraction of audio files from audio-visual documents;
- To create digital copies of analogue documents

Other activities:

- information courses or training (structured according to customer requirements)
- research collaborations with privates and universities

We are able to offer personal solutions
